

Problem-Solving

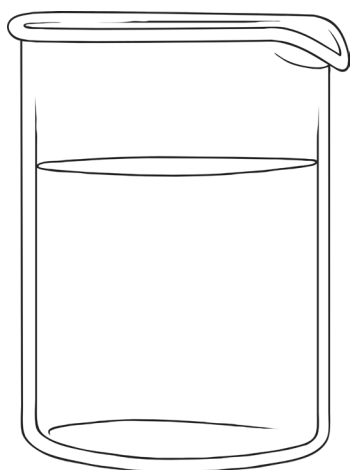

1. You spill a chemical on the desk during a practical. What should you do?

2. You notice a bag in the middle of the floor. What should you do?

3. Your teacher notices a student sitting down at the desk during a practical.
What should they do? Why?

4. You feel hungry during a practical. What should you do about it?

5. You drop a glass beaker on the floor during a practical. What should you do?

Problem-Solving - Answers

1. Tell your teacher. Clear it up if they tell you to do so.
2. Move the bag to either a bag storage area or place under the desk.
3. Ask the pupil to stand up and push their chair under, so if there is a spillage, the pupil can move away more easily.
4. Nothing – wait until the lesson has finished (break/lunch).
5. Tell your teacher. They will brush it up and place it in a glass bin.
